Education

Sinhgad Academy Of Engineering, **Pune** — **Aug 2023 – May 2027**

Bachelor Of Engineering in Computer Science — *CGPA: 9.50/10.0*

MIT Jr College, **Pune** — **Aug 2021 – March 2023**

Higher and Secondary Education in Bifocal Computer Science — *Percentage:- 82.33*

S.M Choksey High School , **Pune** — **March 2020 – April 2021**

Secondary and Higher Secondary Education — *Percentage:-**85.6***

Experience

AI Web Developer Intern , WhiteCode Technology Solutions Pvt Ltd. , Pune — July 2025 – Oct 2025

- Built and deployed **3–4 AI-powered websites and software solutions** for client
- Leading **2–3 active AI projects**, managing the full development lifecycle from requirement analysis to delivery .
- Implemented **AI-driven automation** to optimize internal workflows, improving efficiency and reducing manual effort.

AWS INTERN , TechEasy Consultancy , Pune — May 2025 – June 2025

- Developed **"Real Review"**, a real-time real estate web application, in an **Agile team** with weekly Scrum meetings allowing users to **upload images, post / read reviews, and download content**, creating an interactive platform.
- Deployed the web application using Amazon EC2 for hosting and integrated Amazon S3 to store user-uploaded images Managed data with **DynamoDB** and automated backend processes using **AWS Lambda**.
- Applied **cloud best practices** for deployment, scalability, automation, and security.

Data Analytics & Power BI Intern , Vodafone Idea Foundation, ,Pune — June 2024 – July 2024

- Analyzed datasets to uncover insights, applying data analytics techniques.
- Built interactive dashboards in Power BI for clear data visualization.

Projects

AI-Powered Phishing Detection System (SaaS) | ML & Cybersecurity

- Built an intelligent phishing detection engine using Logistic Regression, accurately identifying malicious emails in real time.
- Direct Gmail inbox scanning with Gmail API + Gemini API fallback ensures reliable detection even on unseen phishing patterns.
- Launched a Chrome Extension that analyzes emails instantly and displays phishing risk scores inside the user's mailbox.
- Productized as a SaaS platform with secure API key access, enabling companies and developers to plug phishing detection into their own systems.

Student Management System | MERN Stack Nrutyashree Dance Academy

- The NDA (Nrutyashree Dance Academy) website serves as a comprehensive student portal designed to streamline the management of student activities, including fees, exam syllabi, and class timetables.
- With an intuitive interface, the platform allows students to easily access their schedules, check exam materials, and manage fee payments, ensuring a seamless educational experience.
- Key features include secure user authentication, real-time updates on important announcements, and a user-friendly dashboard that consolidates essential information.

Patient Health Record (PHR) System | Mern Stack PHR-System

- Developed a secure and user-friendly Electronic Health Record (EHR) system to streamline healthcare data management.
- Implemented **role-based login portals** for patients and doctors with secure authentication. Enabled patients to **upload, manage, and view health documents and prescriptions**.

Technologies

Languages: C++, Python , Java, JavaScript , SQL , HTML/CSS

Database and Developer Tools: MongoDB, MySQL , Git , VSCode

Frameworks and Libraries: ReactJS, NodeJS, Tailwind CSS , REST API , ReactNative.

Relevant Coursework: Database Management, Software Engineering, Data Structures and Algorithms, Operating Systems , Computer Networks

Leadership Awards

Vice President, First Year Student Association (FESA): Led and organized multiple events aimed at enhancing first-year student engagement and fostering a collaborative learning environment.

Association of Computer Engineering Students (ACES): Currently managing different activities while coordinating successful events, including college-level hackathons, demonstrating strong organizational and budgeting skills.

Event Head, Blind Coder – Techtonic (National-Level Techfest): Spearheaded the organization of a coding-based competitive event in association with ACES with 80+ participants, leading a team of 15 volunteers. Oversaw end-to-end planning, problem statement design, and execution, showcasing strong leadership, team management, and event coordination skills in a high-pressure environment.
